## 2. APPLICATION

This Policy applies to Retail and Professional Clients of the Company.

In the case of Retail Clients, in applying the best execution in the normal course of business, we determine the best possible result in terms of total consideration. Total consideration is the price of the financial instrument concerned and the costs payable by the Retail Client as a result of execution. These costs include all expenses incurred that are directly related to the execution of the order (such as execution venue fees, clearing and settlement fees and any other fees paid to third parties involved in the execution of the order). These costs do not include our own commission, spread or margin. We may take the other execution factors into account where they are instrumental in delivering the best possible result (in terms of total consideration) for the Retail Client.

The application of the best execution is neither a guarantee that the best price will be obtained nor a guarantee that the transaction will be executed in full.

During 2022 the Company executed orders for Retail clients and elective Professional clients. The Company when executing orders for Retail Clients, the best possible result was determined in terms of total consideration representing the price of the financial instrument and the costs related to execution, hence these criteria were given precedence over the rest.
